### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The 103(a) rejection of claims 1, 3, 4, 6, 7, 9-13, 15 and 16 over Velzel as indicated on the Office Action dated 14 January 2010 is hereby incorporated by reference in its entirety.

### ***Response to Arguments***

Applicant's arguments filed 14 April 2010 have been fully considered but they are not persuasive.

Applicant's presented arguments concerning addition of a salt (calcium acetate), this still meets the claims just because applicant has pointed out a reduction in pH it cannot currently be gleaned from applicant's specification and arguments how the carboxylate acid of Velzel will result in a negative expectation of success, nor what negativity the decrease of pH will bring to the overall product.

Even if applicant's contention is true (which the Examiner contends it is not), Velzel still broadly discloses species of the claimed Markush group in claim 1 (carboxylic acid, hydroxyl, amine and/or amide groups) as per the examiner's rejection of instant claim 8 in the Office Action dated 14 January 2010. Applicant adds an acid to water and maintains that the pH does **not** decrease (ie, become more acidic). Applicant also argues that adding the corresponding conjugate base to water will make the pH decrease (ie, more acidic). Applicant should demonstrate these statements to be true, and amend the claims to recite the pH at each stage.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
